Effective gentle care
for your pets and your home

Why is “grooming” an important routine for your pet?

Grooming provides many health benefits for your pet, which may not be immediately obvious.

Bathing your dog when needed is an important part of general pet care. For dogs and cats with healthy skin and a healthy coat, the most common reason to bathe is to remove unpleasant odours or dirt that has accumulated on their fur. The benefits of bathing can include cleaning the skin and coat, which helps to remove loose hair, scale and debris and improve the hair coat's shine.

Brushing your dog or cat is also key, as it ventilates their coat, helping it grow healthy and strong and takes away old and damaged hair. Grooming also ensures that your dog and cats' skin can breathe and keeps down the level of grease in their fur.

However, the grooming routine does not finish just after brushing or shampooing your pet. During daily brushing, you should also check the eyes, nose and paws of our furry friend, which also need care.

Every dog and cat is unique, so there is no “one fits all” solution for your pet’s care.

This is why the bogacare® concept offers high-quality pet care products in different forms:

- ✓ **Shampoos and foams:** Our formulas developed by veterinarians and specialists contain organic extracts and are adjusted to the natural pH of the dog's (7.0-7.5) and cat's skin (6.5). Furthermore, we do not use synthetic ingredients, such as mineral oils, silicones and parabens.
- ✓ **Skin and paws:** Minor skin injuries are common for adventurous dogs and cats. Bogacare® Derma Repair, with its scientifically well-documented ingredients, is superbly suited for use as a regeneration cream. Additionally, with our bogacare® Paw Balm, your dog's paw pads stay hydrated and protected throughout the year.
- ✓ **Eyes and ears:** Daily eye care not only removes rheum and crust buildup, it also dissolves tearstains and helps prevent conjunctivitis. Regular and gentle cleaning of the ears is essential for the well-being of your dog and cat too. It helps keep ear mites away and can prevent otitis.

THE BOGAR COMPLETE DOG AND CAT CARE CONCEPT

How should I start grooming my pet?

Start grooming your pet as a puppy or kitten. Choose times when they are tired and less energetic. Limit your grooming sessions to a few minutes, as young pets have short attention spans. Talk in a reassuring manner and check their eyes, ears, teeth, paws, and nails. Over time, your pet will become used to the grooming ritual and enjoy being handled and inspected. Offer them a tasty treat as a reward afterwards.

Grooming is a great bonding time! The more regularly you do it, the more they will get used to it and it should become a soothing relaxing experience for you both.

DERMA-REPAIR 40ml

- ✓ Gentle formula with comfrey, sage and regenerating allantoin
- ✓ Soothes and helps to relieve slight swelling
- ✓ Inhibits the growth of bacteria and fungal infections
- ✓ Promote the regeneration of damaged skin
- ✓ Is quickly absorbed into the skin, non-fatty

SWISS formula

Can I also keep home “well-groomed” while having pets?

Unpleasant smells are caused by the decomposition of organic residues (e.g. urine, faeces, body secretion, vomit, food leftovers, etc.) that penetrate and settle deep into cracks and textiles.

Conventional cleaners and deodorisers cover up the odor on the surface; however, they do not entirely eliminate its cause. This can lead to poor hygiene conditions.

Our bogaclean® products remove odors and stains sustainably with our microbiological technology, that “eats” away odours.

THE BOGAR SMELL FREE CONCEPT

Bogaclean® CLEAN & SMELL FREE products eliminate the causes of unpleasant odors and organic stains and it can also prevent repeated terrain marking by cats. Its high efficiency is achieved thanks to:

- ✓ The bioactive mechanism of action
- ✓ Deep and long-lasting effect
- ✓ Harmlessness to people, animals and the environment
- ✓ Preservation of the good condition of the targeted surfaces and textiles

How these products work exactly?

The bioactive mechanism of action is triggered by the **5 Bio-Active Bacteria Complex**, which has the following characteristics and function cascade:

- ✓ Complex of 5 mild bacterial strains, up to 75 million of CFU/ml*
- ✓ It penetrates deep into the surface, gets activated through contact with water and the organic material
- ✓ It eliminates the cause of odors and stains by directly and efficiently destroying organic residues

*CFU=colony-forming unit: the determination of the number of viable microorganism cells in the culture medium

READY TO USE SPRAYS

ALL PURPOSE CONCENTRATE

CLEAN & SMELL FREE SPRAY 750ml

- ✓ 5 Bio-Active Bacteria Complex (microbiological mechanism of action)
- ✓ Ready-to-use
- ✓ Cleans spots on floors, carpets, surfaces, textile, wood, etc.
- ✓ Eliminates unpleasant odors long-term, deeply penetrating
